SUMMER PROJECT REPORT

WEEK 3

1 Project status and status of project tasks

- **Server set up and part of database tables created**

- **Login and sign-in forms can be posted to database tables**

- **The unfinished web has been deployed to Heroku for the next step**

- **Still have problems fetching data from the database to display in HTML**

2 Planning, tasks, and goals for next week

- **Solve the problem of fetching data from the database to display in HTML tables**

- **Based on the problem solved, make the database more reasonable and complete**

3 Project risks and problems

- **Might need to change the whole logic of the previous work to solve the display data in HTML table problem**

4 Lessons learned this week

- **Lots of lectures on Youtube about how to fetch data from a database and display it in HTML**
